

AMI

Safely Collecting
Securely Erasing
Simply Re-Using IT

Unlock the potential value of your IT equipment with AMI

The AMI Process

Safely Collecting

- Client's order raised to AMI
- Client prepares equipment for collection
- AMI completes the collection
- The collection is transported to one of our secure AMI warehouses

Securely Erasing

- Each item is barcoded, scanned and processed into our bespoke tracking system
- Audit completed to determine if equipment is suitable for remarketing
- All data bearing equipment (whether remarketed or not) is processed through Blancco to permanently erase any customer data

Simply Re-Using IT

- Any equipment that is not suitable for remarketing is recycled
- For the equipment that is suitable for remarketing, repairs (if required) are completed
- The equipment is cleaned, packed, graded and shelved in the AMI remarketing warehouse until sold
- The client receives their agreed revenue share back on their remarketed equipment
